Professional Summary

Aspiring DevOps Engineer with 6 months of hands-on experience in cloud infrastructure automation, CI/CD implementation, containerization, and IaC. AWS Certified Cloud Practitioner skilled in AWS, Terraform, Ansible, Docker, Kubernetes, and GitHub Actions. Seeking roles in DevOps, Cloud Engineering, SRE, and Platform Engineering.

Technical Skills

Cloud: AWS (EC2, IAM, VPC, Subnets, Route Tables, IGW, Security Groups, Elastic IP, S3, CloudWatch, RDS, Route 53, Lambda, SNS)
DevOps & CI/CD: Git, GitHub, GitHub Actions, Docker, Kubernetes, Terraform, Ansible
Monitoring: CloudWatch, Prometheus, Grafana (Fundamentals), MySQL Exporter
OS & Scripting: Ubuntu Linux, Fedora Linux, Python, Bash, Shell Scripting, YAML, JSON
Web & Databases: Nginx, MySQL
Networking & IaC: TCP/IP, DNS, SSH, Subnetting, IaC, Configuration Management, Containerization, CI/CD Automation

Projects

End-to-End Infrastructure Automation Pipeline

GitHub [↗](#)

- Architected a fully automated CI workflow using GitHub Actions to execute Terraform provisioning and Ansible configuration management.
- Provisioned AWS infrastructure (VPC, Subnets, Route Tables, IGW, Security Groups, EC2, Elastic IP) using Terraform with S3 remote state management.
- Automated EC2 configuration, Docker installation, and application startup using Ansible dynamic inventory and playbooks; reduced setup time from ~45 min to under 5 min with 90%+ deployment automation.

Kubernetes-Based DevOps Task Management Platform

GitHub [↗](#)

- Built and deployed a containerized multi-tier task management platform using Flask, MySQL, Docker, and Kubernetes.
- Orchestrated deployment using Kubernetes Deployments, Services, Secrets, Ingress, Persistent Volume Claims, and ServiceMonitors; implemented GitHub Actions CI pipeline for automated Docker image building, versioning, and publishing to Docker Hub.
- Implemented basic monitoring using Prometheus, Grafana, and MySQL Exporter to visualize Kubernetes pod metrics and Flask application metrics.

Professional Training

AWS re/Start Program Trainee | AWS & TNSkills

Jul 2025 – Nov 2025

- Completed hands-on training in AWS Cloud, Linux Administration, Networking, Security, and DevOps fundamentals; worked with EC2, IAM, VPC, S3, Route 53, and CloudWatch through practical labs.
- Performed Linux system administration, shell scripting, troubleshooting, and cloud infrastructure exercises; earned the AWS Certified Cloud Practitioner (CLF-C02) certification.

Education

University College of Engineering, Anna University, Panruti *B.E. – Electronics and Communication Engineering*

Nov 2021 – Jun 2025

CGPA: 7.1/10

Certifications

- AWS Certified Cloud Practitioner (CLF-C02) – AWS (Nov 2025, Valid Until Nov 2028)
- AWS re/Start Graduate – AWS & TNSkills (Sep 2025)
- Terraform: Managing Infrastructure as Code – Packt (May 2026)
- 100 Days of DevOps Bootcamp – Udemy (Mar 2026)

Additional Information

Languages: English (Professional), Tamil (Native), Telugu (Professional) Open to relocation across India Seeking full-time roles in DevOps, Cloud Engineering, SRE, Platform Engineering, and Infrastructure Engineering
